# APICULTURE

NEW ZEALAND

## Backing the Apiculture Industry

We work directly for Apiculture New Zealand members. Through our work, we create opportunities for members, and we sort out problems for members.

We make sure members have what they need to do business better. Our goal is to make our industry stronger and more profitable by:

Protecting	Representing	Influencing	Informing
Leading policy and programmes to protect the health of NZ's bees, and that support the ongoing growth and value of the apiculture industry.	Advocating for the apiculture industry, particularly Association members, on all relevant issues, including to government.	Positioning apiculture and beekeeping as a vital agri-sector which is of major social and economic significance to NZ.	Ensuring NZ bee products are acknowledged for their authenticity and integrity, through the development of best practice policy for industry.

BEES GIVING LIFE

# APICULTURE

NEW ZEALAND

## Apiculture New Zealand has an intensive and extensive workplan. Here's what we will do for you:

- Oppose the import of honey and bee products from countries of known risk
- Work with government to keep pests and diseases out of New Zealand
- Support increased market access and added value product research
- Fund well planned and managed scientific research
- Provide health and safety advice and systems, and employment information and contracts
- Provide information on landowner contracts and fees
- Run training and education programmes for industry members
- Give our industry a stronger voice with government
- Progress GIA so we have good biosecurity plans in place
- Seek solutions to the growing problem of hive thefts and cowboy beekeepers muscling in on others' territory
