

ApiNZ Science and Research Focus Group Meeting July 2022 Update for members

Apiculture Conference June 2022 debrief

The group discussed the role of the Science Symposium and the Apiculture Conference and discussed options for improvements to these events for the future.

International and national research that could be useful to members

The group discussed recent research that could be useful to members. The group recommended providing information on varroa management strategies and nosema in upcoming New Zealand Beekeeper journals.

Additional group members

The group discussed which Crown Research Institutes that undertake research in the apiculture sector should be approached to assess interest in joining the group. These Crown research Institutes will be approached shortly to assess their interest in joining the group.
